

High Gain Digital TV Antenna VHF (6-12) 8 Elements 03MM-DC21V

The 03MM-DC21V is an eight-element Yagi-style antenna receiving channels 6-12 with a maximum gain of 8dB. The antenna features a 4G/5G LTE filter built in to help eliminate interference and deliver the best possible pictures for viewing. The heavy-duty 12.7mm extruded aluminium tubing on the DC21V is designed to handle the harsh Australian environment. This antenna is perfect for medium to long-range reception in metro or country regions for VHF (Band 3).
