

Digital TV Antenna
VHF (6-12) 4 Elements
03MM-DR3004

The 03MM-DR3004 is a four-element VHF Yagi-style antenna receiving channels 6-12 with a maximum gain of 7dB. The antenna features a 4G/5G LTE filter built in to help eliminate interference and deliver the best possible pictures for viewing. With the elements constructed from heavy-duty 12.7mm extruded aluminium tube, the DR3004 is well designed to handle the harsh Australian environment. The DR3004 is suited for high signal and metro band three reception areas, including the reception of DAB+ radio services.
