AJ SERIES AT SERIES

Stainless Steel Terminal Box

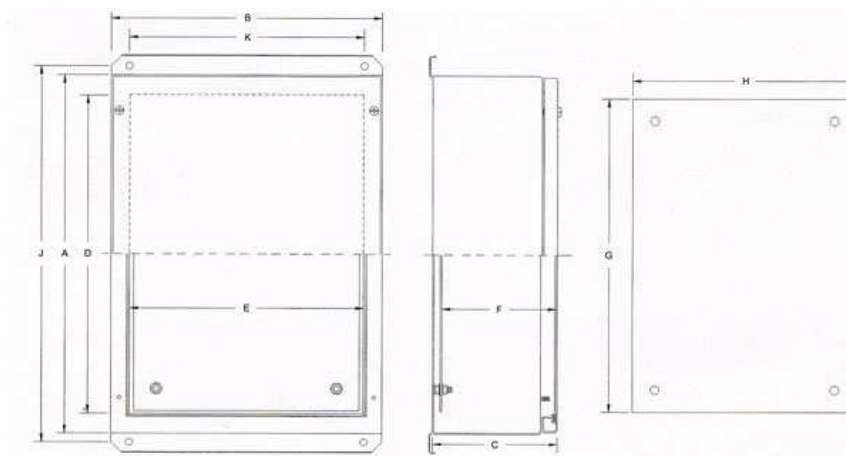

The 316 Stainless Steel Terminal Box with its IP rating of IP67 is achieved by having the lid fixing external to the lid gasket, which means even if a lid screw is missing the IP rating can be maintained.

Having external mounting flanges makes this enclosure a very desirable product in hostile environments.

Body Material	Stainless Steel	Gasket Material	Polyurethane foam
Grade	316	Gasket Type	Pour in place
Body Thickness	1.5mm	Gasket Surface	Smooth, Ingress Resistant Skin
Panel Material	Aluminium	Mounting provision	27mm Flanges

Panel Thickness	3mm	Mounting Holes	8mm x 15mm
Panel Coating	Gold Anodized	IP Rating	IP67
Lid Fastening	Screw into Post Stud
