CJS Customers

Cable Jointing Supplies have supplied these components to many of Australia's largest and most successful mining and commercial companies. At Cable Jointing Supplies we are very proud of our extensive list of loyal customers!

Products > Low Voltage > Wrap Around Sleeves

Wrap Around Sleeves. (WSRS)

A wrap-around sleeve is mainly used for repairing outer/inner sheath/core damages on HV and LV cables. They can also be used for protecting against corrosion on metallic parts of the cable that are exposed to the elements.

Since Cable Jointing Supplies' wrap-around sleeves are waterproof, they can be used to provide moisture-proof protection of corrosion prone pipelines and processing accessories etc.

A wrap-around sleeve provides an economic solution for cable repairs which would otherwise mean removing the offending section of cable, a comparatively costly process.

Clicking on an item's Part Number will add it to your enquiry cart
