Hyena Wall Boxes

- Sturdy polycarbonate construction and well insulated.
- HY1GPWBR features 7.5mm recessed internal rim for suitability of slim plate ranges to provide more room at the front region of the box aperture
- Strengthened corner features to prevent breakage when hammering into brick recesses.
- Self-gripping claws for sturdy attachment in brickwork.
- Sliding nuts at 84mm centers with protective tape to prevent concrete slurry or dust entering the threads until they are needed for use by the electrician.
- Ideally suited for Trader Flat Cat, Leopard and Cheetah sockets to provide additional space for shallow plate socket features.

Knock-outs/entries:

Cleaning Guide:

Spraying cleaning products on to electrical products is not recommended.

It is important to ensure that switches are turned off before cleaning.

Do not use any cleaning sprays - only wipe down with damp cloth or rub with dry cloth. (Do not use an abrasive cloth as it may scratch the plastic).

Do not use harsh chemical cleaners as these can break down the plastic and cause it to crack.

Hyena Mounting Flanges

- HYMF and HYMFBK 41mm deep mounting flange with 84mm spaced brass metal threaded inserts.

HYBOXWP

*See current catalogue for further detail

Hyena Weatherproof Box - IP33

- Robust weatherproof box suitable for installing electrical plate mounted accessories such as sockets and switches.
- 84mm centres with 33mm internal depth to bosses in bottom of box; or 40mm total depth to the rear of internal box.
- Bottom threaded entry 25mm and top entry 20mm, 2 x 20mm rear drill out entries.
- Locking facility for clear hinged flap.
- Box colour light grey.

Manufacturer's Installation Instructions

1. When installing the HYBOXWP ensure the product is mounted securely against the wall using the drill points in the covered recesses. Ensure the screw area is well sealed with silicone to protect the IP rating and apply internal screw caps.

2. Ensure all threaded entries are sealed with silicone sealant or PVC glue. If the rear entries are used ensure the box is sealed well against the wall and that any entries are sealed and water tight to prevent leaks.

3. Install socket outlet or wall plate accessory and ensure it is securely fastened and that the flap can close fully.

Suggested installation to maintain weatherproofing using permanently installed plugs

If using the assembly with plugs that are required to be inserted for permanent applications it is best to break out the lower tabs to allow cable clearance and utilise side entry plugs so that the flap can remain closed for maximum protection.

Catalogue Number	Description

Cleaning Guide:

Spraying cleaning products on to electrical products is not recommended. It is important to ensure that switches are turned off before cleaning.

Do not use any cleaning sprays - only wipe down with damp cloth or rub with dry cloth. (Do not use an abrasive cloth as it may scratch the plastic).

Do not use harsh chemical cleaners as these can break down the plastic and cause it to crack.

Hyena Ceiling Rose
