DIMENSION INFORMATION

Cone Centres are designed to suit the reverse cycle systems. Cone Centres allow adjustable control of the airflow by moving the centre up or down.

This is achieved by a screwing technique. Clockwise decreases and shallows the airflow while anti-clockwise increases and deepens the airflow.

Duct Size (mm)	Face Size (mm)	Spigot Diameter (mm)	Spigot Length (mm)	Cut-Out Size (mm)
100	149	99	47	98
125	169	125	47	123
150	186	148	50	148
200	235	198	50	198
