

SafeStyle FMBP100 UV400 Fusions Matte Black Frame Polarised Lens

Whether you're flickin' lures on the beach or out prospecting for gold in the desert, the Matte Blacks have got you covered. This range is the black sheep of the family. Identical in shape to the classics and fusions, while boasting a sleek Matte Black finish with tinted UV400 side shields to keep that side glare at bay. Without getting too technical, the Matte Blacks are sporting advanced lens technology with Oleophobic water and oil resistant coating matched with a category 3 lens, dimming it down to a low 14% light transmission.

SafeStyle's polarised lenses are perfect for outdoor use with a dark tint for general use and work by reducing glare from the road, water, snow or any bright light reflective surface. SafeStyles polarised lenses also have an additional oleophobic coating to eliminate any chance of water, oils or fingerprints sticking to the lenses.. a great feature for out on the water! All SafeStyle lenses are made from 100% recyclable UV400 shatterproof polycarbonate, blocking 99.9% of UVA/UVB with a super-hard anti-scratch coating.
