Low Voltage Rescue Kit - Volt Safety

SKU/Part #
KIT-LVR

Low Voltage Switchboard Rescue Kits made by Volt Safety are a must-have kit for most Electricians and are designed to be used by the safety observer in the event of on-site electrical shock. It enables the safety observer to safely perform rescue from a live LV switchboard panel without being electrically shocked.

NB The insulated gloves supplied in this kit are required to come in size 11 to ensure the gloves can fit different safety observers. The gloves are stamped 'RESCUE USE ONLY' to state that they should *not* be used as everyday working gloves, as the gloves need to be suitable for purpose in the event that a rescue is required.

Key Features:

- Conforms to the requirements of Australian energy providers
- Hi-Vis bag with reflective font to ensure kit is easily findable in dark environments
