## VOLT SAFETY INSULATED TELESCOPIC STICK

### PRODUCTS CODES

CODE/S: STICK2.5 STICK8.0 STICK10.0

### STANDARDS/RATINGS:

- ASTM F7111
- IEC 60855
- Complies with and tested to AS/NZS 5804.3

### FEATURES/CONTENTS:

- Triangular fiberglass construction for stability
- New Clip Lock to lock into any height
- Foam Filled Tip Piece
- Height Markings
- Disconnect Hook Attachment
- Fuse Puller/Pig Tail Attachment
- Protective Carry Bag
- 12 Month Manufacturers Guarantee

### DESCRIPTION:

Volt Safety Telescopic Stick is constructed with high quality fiberglass in a triangular shape to create greater stability and less flex when fully extended. The new clip style locking mechanism allows the user to lock in the stick at the preferred height instead of having to lock it in the fully extended position. Our sticks come complete with disconnect hook, fuse puller and carry bag. The recommended maximum test interval is 6 months.

### OPTIONS:

- STICK2.5
- STICK8.0
- STICK10.0
- Additional lengths and designs available on request
- Additional attachments available on request
